MONTGOMERY COLLEGE - Germantown Campus Mathematics & Statistics Department Course Syllabus

I. Instructor Information

Professor: Zhou Dong Email: Zhou.Dong@MontgomeryCollege.edu ¹Phone: (240) 567-7810 ²Office: HT 134 Germantown campus

 Office Hours:

 Drop-in virtual office hours

 Click here to join the MW office hours

 Click here to join the TR office hours

 In-person office hours

 MW 9:30 am – 12:00 pm in HT134

 Appointment hours

 MW 9:30 am – 12:00 pm and T 11:00 am – 2:30 pm

Learning Assistant: Amy Tran Email: <u>atran77@montgomerycollege.edu</u> Office Hours: TBA

II. General Course Information

Calculus I – MATH181

4 credits / 5 hours (For computation of tuition, this course is equivalent to five semester hours. Five hours each week.)

Intended primarily for students of the physical sciences, engineering, and mathematics. An introduction to major ideas of single variable calculus including limits, derivatives, and integrals of algebraic and transcendental functions; applications.

MATH181 fulfills a General Education Program Mathematics Foundation requirement.

PREREQUISITE:

A grade of C or better in MATH 165, appropriate score on mathematics assessment test, or consent of department. Assessment levels: ENGL 101/101A or AELW 940, READ 120 or AELR 930.

Fall 2021: CRN 22780 Class Times: TR 8:00 am – 10:10 am

¹ If you call, please leave a message. Best way to reach me during Remote Instruction is to message me on Microsoft Teams.

 $^{^{2}}$ I will only be available in my office on Mondays 9:30 am - 12:00 pm.

Teams class meeting link

III. Common Course Student Learning Outcomes

Upon course completion, a student will be able to:

- Determine when and how to apply the Fundamental Theorem of Calculus.
- Evaluate limits graphically, algebraically, and numerically.
- Explain and distinguish between average and instantaneous rates of change and be able to interpret each within the context of an applied problem.
- Find a derivative directly from the definition of a derivative.
- Identify and apply the appropriate rule(s) for symbolic differentiation.
- Implicitly differentiate a function.
- Interpret derivatives verbally in the context of an application.
- Interpret limits verbally.
- Interpret the definite integral as a limit of sums.
- Interpret the indefinite integral as an inverse process of differentiation and evaluate indefinite integrals.
- Set up and evaluate definite integrals to solve applied problems, such as problems involving area, motion, and net change.
- Use derivatives to determine the extreme values of a function.
- Use derivatives to model and analyze a variety of applications, such as problems involving optimization, related rates, and motion.
- Use first and second derivatives to obtain information about the graph of a function and use the graph of a function to obtain information about its first and second derivatives.
- Use technology to discover, explore, illustrate, and understand limits, derivatives, and integrals.

IV. Textbooks, Workbooks, and Supplies

Required materials for the course:

- *Contemporary Calculus*, by Dale Hoffman.
 - This free text can be access online at
 - http://scidiv.bellevuecollege.edu/dh/Calculus_all/Calculus_all.html
- *MyOpenMath* for access to online homework.
 - Register for a free student account at <u>https://www.myopenmath.com/</u>
 - MyOpenMath Course Enrollment Key: mcmath181dong
- Graphing calculator
 - A TI-83 or TI-83 Plus (<u>http://wabbitemu.org/</u>)
 - Desmos (<u>www.desmos.com/calculator</u>)
- *Microsoft Teams and OneNote* for course meetings, announcements and communication.
 - MC students can download these programs for free from their <u>Microsoft</u> <u>365 account accessed through MyMC</u>.
 - Link to Team

Requirements for remote instruction:

- New hardware specifications, for general and several specific programs, have been updated to help prepare students for online learning and ensure that all systems used will function properly. Please visit the <u>Hardware Specifications</u> page for the most up-to-date information.
- Cable service providers in the Montgomery County area (Comcast, RCN, and Verizon) are offering low-cost monthly internet service options to low-income residents. For eligibility requirements and additional information visit <u>Low-Cost</u> <u>Home Internet Access.</u>

V. Course Design

This course is designed to give the student a high degree of autonomy and students are expected to self-direct their learning. While many resources are provided for the student to aid in their learning, the final course grade is based solely on the student's mastery of the course standards as determined through assessments (see section B. Course Grade for details). This means it is up to the student to determine which resources to use (e.g. class attendance, textbook, lecture videos, online practice problems, etc.) in order to gain mastery of the course standards. Feedback on online assignments are provided for learning purposes only and will not affect the student's final course grade.

A. Bloom's Taxonomy

This class has been designed based on Bloom's Taxonomy. A basic understanding of Bloom's Taxonomy will help the student understand the course design as well as make better choices about how best to gain mastery of the material and be successful in this class.

Bloom's Taxonomy

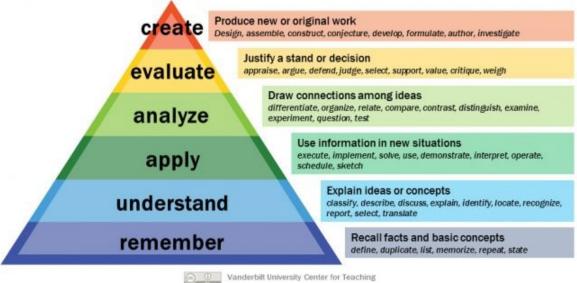

Figure 1 - Bloom's Taxonomy, from <u>https://cft.vanderbilt.edu/guides-sub-pages/blooms-taxonomy/</u>

B. Flipped Classroom Instruction

Under the flipped classroom model, students begin learning the course material at home before class, while class time is focused on solidifying understanding through active discussion and problems solving:

Before class:

- Read textbook or lecture slides, or watch lecture videos
- Self-assess using Pre-class Assessment on WebAssign
- Prepare questions for class discussion

During class:

- Participate in class discussion facilitated by the instructor
- Work in groups or individually on in-class assignments, with instructor support
- Receive individual and/or small group instruction as needed

After class:

- Prepare for assessments and reassessments
 - Complete Practice Problem Assignments on WebAssign
 - Take practice quizzes in the Personal Study Plan on WebAssign
 - Attend instructor and LA office hours
 - Utilize MAPEL Center tutoring
- Take assessments and reassessments as needed

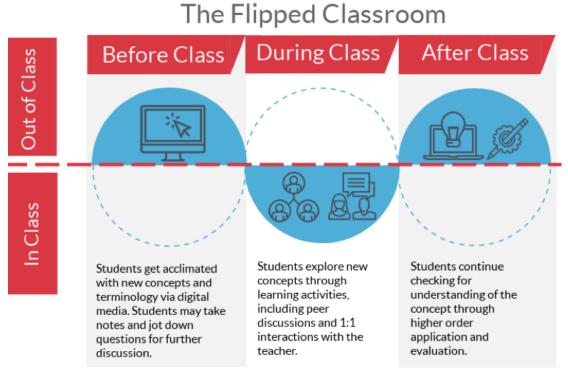

Figure 2 - The Flipped Classroom, from <u>https://www.odysseyware.com/blog/using-classpace-flipped-classroom</u>

While preparing for class, students have their initial exposure to the new material through reading the textbook and lecture slides and watching lecture videos. The focus at this time is on the *Remember* and *Understand* levels of Bloom's Taxonomy:

• Memorize definitions and theorems

- Paraphrase definitions and theorems
- Understand worked examples

During class, students work with each other and the instructor to develop the *Apply, Analyze*, and *Evaluate* levels of Bloom's Taxonomy. Occasionally, students are expected to reach the *Create* level of Bloom's Taxonomy. After class, students should focus on consolidating their learning through additional practice and self-assessment in order to demonstrate mastery of course standards.

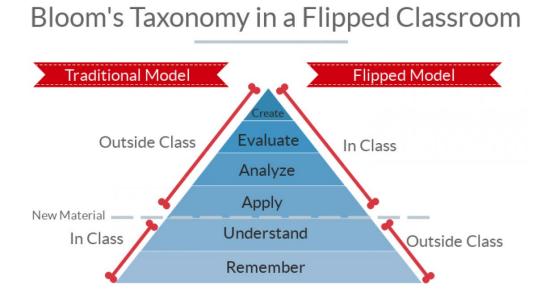

Figure 3- Bloom's Taxonomy in a Flipped Classroom, from <u>https://www.odysseyware.com/blog/using-classpace-flipped-</u> <u>classroom</u>

It is essential that students put in the time and effort necessary in and out of class. It is generally recommended that for each hour of in-class time, the student spends 2-3 hours out of class studying. This class meets for 5 hours each week, therefore, *students should expect to spend* 10 - 15 *hours outside class time studying for this class.*

VI. Course Requirements

A. Course Standards

This course has 30 core standards and 19 elective standards (49 standards total). The 30 core standards are essential material and EACH standard must be mastered in order to earn a grade of "C" or above. Most core standards are at the Apply and Analyze levels of Bloom's Taxonomy. The elective standards are either optional topics or a higher level question for a core standard topic. Detailed grading criteria can be found in section D. Course Grade and section E. Standards.

| Core | Standard | Standard | |
|----------|----------|---|--|
| Elective | Code | Description | |
| С | 0.1BP | State the two basic problems of calculus. | |
| | | State whether an element is a member of "A and B" and "A or B" for given sets A | |
| С | 0.5AO | and B. | |

| | | State whether a given "If then" statement is true or false and justify the | | |
|---|-------|---|--|--|
| С | 0.5IF | answer. | | |
| E | 0.5HC | State which parts of a mathematical statement are assumptions (hypotheses) and which parts are conditions. | | |
| Е | 0.5CP | State the contrapositive (equivalent) form of an "If then" statement. | | |
| с | 1.1LG | Determine the values of limits (one- and two-sided) for a function or determine that the limits do not exist based on its graph or a table of values. | | |
| | | Use algebraic methods (not including the squeeze theorem) to determine the values of limits (one- and two-sided) for a function or determine that the limits do | | |
| E | 1.2LA | not exist. | | |
| E | 1.2SQ | Apply the Squeeze Theorem appropriately to compute limits. | | |
| с | 1.3CD | Apply the definition of continuity to determine whether a given function is continuous at a point. | | |
| E | 1.3IV | Determine the number of times a function has a given value by using the Intermediate Value Theorem for continuous functions. | | |
| E | 1.3BA | Approximate roots of functions by using the Bisection Algorithm. | | |
| с | 1.4DE | For a given epsilon, find the required delta graphically and algebraically (for linear and quadratic functions). | | |
| E | 1.4PF | Apply the "epsilon-delta" definition to prove statements about limits. | | |
| с | 2.0ES | Estimate a tangent line slope and an instantaneous rate of change from the graph of a function. | | |
| с | 2.1DM | State the graphic and rate meanings of $f'(x)$ and apply the correct units to the result. | | |
| С | 2.1TL | Write the equation of the line tangent to the graph of a function. | | |
| С | 2.1DN | Recognize and use the common equivalent notations for the derivative. | | |
| E | 2.1DD | Apply the definition of f'(x) to calculate its value. | | |
| с | 2.2CD | State whether a function (given by a graph or formula) is continuous or differentiable at a point or on an interval. | | |
| с | 2.3DF | Calculate the derivatives of elementary functions and combinations (not including compositions) of elementary functions (not including logarithms). | | |
| E | 2.3HD | Calculate second and higher order derivatives and state what they measure. | | |
| с | 2.5DC | Calculate the derivatives of elementary functions and compositions of elementary functions (including logarithms). | | |
| E | 2.5PD | Calculate the derivatives of functions given as parametric equations and interpret their meanings geometrically and physically. | | |
| C | 2.6RR | Solve related rate problems using derivatives. | | |
| С | 2.7NM | Approximate the solutions of equations by using derivatives (Newton's method). | | |
| E | 2.7NF | Analyze situations in which Newton's Method fails to converge to the desired root. | | |
| С | 2.8LA | Approximate the values of "difficult" functions by using derivatives. | | |
| E | 2.8DF | Calculate the differential of a function using derivatives and show what the differential represents on a graph. | | |
| E | 2.9IM | Calculate the derivatives of "really difficult" functions by using the method of Implicit Differentiation. | | |
| E | 2.9LD | Calculate the derivatives of "really difficult" functions by using the method of Logarithmic Differentiation. | | |
| C | 3.1MM | State whether a given point on a graph is a "global/local maximum/minimum". | | |
| с | 3.1CE | Find critical points and extreme values (max/min) of functions by using derivatives. | | |
| E | 3.2RM | Graphically and using derivatives, find the values guaranteed to exist by Rolle's Theorem and by the Mean Value Theorem. | | |
| C | 3.3GD | Use the graph of f to sketch the shape of the graph of f'. | | |

| | | Use values of f' to sketch the graph of f and state whether f is increasing or | | |
|---|-------|---|--|--|
| E | 3.3GA | decreasing at a point. | | |
| С | 3.4CC | Use values of f" to determine the concavity of the graph of f. | | |
| С | 3.4DV | Use the graph of f to determine if f" is positive, negative, or zero. | | |
| | | Solve applied max/min problems by using derivatives and restate in words the | | |
| | | meanings of solutions to applied problems, attaching the appropriate units to an | | |
| E | 3.5AM | answer. | | |
| С | 3.6AL | Determine asymptotes of a function by using limits. | | |
| С | 3.7LH | Apply L'Hopital's Rule to compute limits of 0/0 and ∞/∞ forms. | | |
| | | Determine the values of other indeterminate form limits by using derivatives and | | |
| E | 3.7IF | L'Hopital's Rule. | | |
| С | 4.1SM | Evaluate a sum given in sigma notation. | | |
| С | 4.1RS | Set up an area as a Riemann sum. | | |
| С | 4.2DI | Define the definite integral of a function. | | |
| С | 4.3PR | Define the properties of definite integrals as properties of areas. | | |
| | | Use the various interpretations of the definite integral to solve problems of area, | | |
| E | 4.4AD | distance and accumulation and assign correct units to the result. | | |
| С | 4.5FT | State and describe the meaning of the Fundamental Theorem of Calculus. | | |
| С | 4.5EV | Use antiderivatives to exactly evaluate definite integrals. | | |
| | | Determine antiderivatives using the method of Change of Variable (U- | | |
| E | 4.6CV | Substitution). | | |

B. Course Grade

This course uses Standards Based Grading. Your course grade will be based solely on mastery of the course standards. Assessments of standards will be graded as follows:

| Score | Mastery Level | Student work | |
|-------|---------------|---|--|
| 4 | Perfect | Demonstrates complete understanding of the underlying | |
| | Mastery | concept and provides correct solution with appropriate | |
| | | notation and use of language | |
| 3 | Imperfect | Demonstrates complete understanding of the underlying | |
| | Mastery | concept but has minor errors in calculation and/or problems | |
| | | with notation and use of language | |
| 2 | Developing | Demonstrates developing but incomplete understanding of | |
| | | the concept and/or major errors in the computation and | |
| | | presentation of the solution | |
| 1 | Novice | Demonstrates little to no understanding of the concept with | |
| | | some relevant computations | |
| 0 | No evidence | Demonstrates no evidence of understanding or not | |
| | | attempted | |

Both Perfect Mastery (score = 4) and Imperfect Mastery (score = 3) are considered mastery. A student is only required to demonstrate mastery on a standard once.

There will be three (3) opportunities for demonstrating mastery on each standard:

- 1. Initial assessments (weekly)
- 2. Reassessment the week following the initial assessments

3. Final assessment during final exam week

| Initial Assessment | | | |
|--|---|--|--|
| If score is 3 or 4, | Reassessment | Final According | |
| you are done! | If score is 3 or 4, you are done! If score is 2 or below, standard will be on final exam. | Final Assessment | |
| If score is 2 or below, take reassessment the following week. | | This is your last opportunity to show mastery of the standards! | |
| | | | |

Figure 4 Assessment flow chart

C. Standards

Final letter grades will be determined according to this rubric:

| Grade | Core Standards | All standards (Core and Elective) |
|-------|-------------------|--------------------------------------|
| А | Mastery on all | Average score is 3.4 or above |
| В | Mastery on all | Average score is between 3 and 3.4 |
| С | Mastery on all | Average score is below 3 |
| D | Not all mastered | Average score is above 2 |
| F | Not all mastered | Average score is below 2 |

Note:

- Mastery means a score of 3 or 4.
- For the grades of A, B, or C, you must demonstrate mastery on ALL Core Standards.

D. Assessments and Make-up Policy

Students have a 24-hour window to take initial and reassessments each week starting in Week 2. Date and time will be determined during the first week of classes.

The Final Exam will be given during the 24-hour window during final exam week. Date and time will be determined during the last week of classes.

Make-ups for missed assessments will not be available. All assignments on MyOpenMath have LatePass allowed (automatic extensions).

VII. Student Code of Conduct

A. Standards of College Behavior

Students are expected to adhere to the Montgomery College Student Code of Conduct: <u>https://www.montgomerycollege.edu/_documents/policies-and-procedures/42001-student-code-of-conduct.pdf</u>

B. Academic Honesty

All assessments in this class are closed-notes, closed-book, and individual. No collaboration is allowed on any assessment. All students are required to sign an honor pledge prior to taking any assessments for the course. Once the student has agreed to abide by the honor pledge the student will be able to self-proctor according to these rules:

- Student will not open the assessment questions prior to taking the assessment
- Student will not consult any resources (textbook, notes, internet, another person, etc.) other than the use of an approved calculator while completing the assessment
- Student will not discuss the assessment with anyone other than the instructor or LA prior to the due date

Students should refer to the Student Code of Conduct or the following excerpt for more details:

https://www.montgomerycollege.edu/_documents/academics/support/learningcenters/writing-reading-learning-ctr-germantown/academic-dishonesty-and-how-it-ishandled.pdf

VIII. Collegewide Policies and Procedures

A. Attendance Policy

Students are encouraged to attend and actively participate in all class meetings. As group work is often part of class, students who regularly miss class will no longer be assigned a group. Students who miss more than one week of class and assessments may be dropped from the course for excessive absences as per the Montgomery College <u>Academic Regulations and Standards</u>.

B. Withdrawal and Refund Dates

- Refund Drop Deadline September 8, 2021
- No Grade Drop & Audit/Credit Deadline September 22, 2021
- W Grade Drop Deadline November 17, 2021

C. Audit Policy

All students registered for audit are required to consult with the instructor before or during the first class session in which they are in audit status, and students are required to participate in all course activities unless otherwise agreed upon by the student and instructor at the time of consultation. Failure to consult with the instructor or to so par-ticipate may result in the grade of "W" being awarded. This action may be taken by the in-structor by changing the "AU" to "W" before the drop with "W" date.

D. Disability Support Services

Any student who needs an accommodation due to a disability should make an appointment to see me during my office hours. In order to receive accom-modations, a letter from Disability Support Services (G-SA 189; R-CB 122; or TP/SS-ST 122) will be needed. Any student who may need assistance in the event of an emergency evacuation must identify to the Disability Support Services Office; guidelines for emergency evacuations for individuals with disabilities are found at: http://www.montgomerycollege.edu/dss

E. Veteran's Services

If you are a veteran or on active or reserve status and you are interested in information regarding opportunities, programs and/or services, please visit the Combat2College website at <u>http://www.montgomerycollege.edu/combat2college</u>

F. Delayed Opening or Closing of the College

If a class can meet for 50% or more of its regularly scheduled meeting time OR if the class can meet for 50 minutes or more, it will meet. Montgomery College will always operate on its regular schedule unless otherwise announced. Depending on the nature of the incident, notifications of emergencies and changes to the College's operational status will be communicated through one or more communication methods including the College's website <u>http://www.montgomerycollege.edu</u>. For the most up-to-date information regarding College openings, closings, or emergencies, all students, faculty, and staff are encouraged to sign up for email and text alerts via Montgomery College ALERT. Registration information is available at http://www.montgomerycollege.edu/emergency.

G. Communication

This course will use your official Montgomery College email address, Microsoft Teams, and Microsoft OneNote for communication. This course will NOT use Blackboard for communication.

IX. Honors Module

This class has an attached honors module for eligible students. Enrollment is limited to students who meet Honors Program eligibility standards. If you are interested in taking this as an honors class, you must meet with the instructor during the first two weeks of classes.

A. Honors Eligibility

- Completion of at least 12 Montgomery College credits
- Cumulative 3.2 grade point average or higher
- Grade of A or B in ENGL 101 or ENGL 101A

X. Schedule

A. Class Meeting Schedule

| Week | Date | Class Topic | |
|------|-----------|--|--|
| | | How to Succeed in Calculus | |
| | | Advice from Successful Calculus Students | |
| | Tue 8/31 | Chapter 0 Review and Preview | |
| | | 1.0 Slopes & Velocities | |
| 1 | Thu 9/02 | 1.1 Limit of a Function | |
| | Tue 9/07 | 1.2 Limit Properties | |
| 2 | Thu 9/09 | 1.3 Continuous Functions | |
| | Tue 9/14 | 1.4 Formal Definition of Limit | |
| 3 | Thu 9/16 | 2.0 Slope of a Tangent Line | |
| | Tue 9/21 | 2.1 Definition of Derivative | |
| 4 | Thu 9/23 | 2.2 Differentiation Formulas | |
| | Tue 9/28 | 2.3 More Differentiation Patterns | |
| 5 | Thu 9/30 | 2.4 Chain Rule (!!!) | |
| | Tue 10/05 | 2.5 Using the Chain Rule | |
| 6 | Thu 10/07 | 2.6 Related Rates | |
| | Tue 10/12 | 2.7 Newton's Method | |
| 7 | Thu 10/14 | 2.8 Linear Approximation | |
| | Tue 10/19 | Advising Day - No classes | |
| 8 | Thu 10/21 | 2.9 Implicit Differentiation | |
| | Tue 10/26 | 3.1 Introduction to Maximums & Minimums | |
| 9 | Thu 10/28 | 3.2 Mean Value Theorem | |
| | | 3.3 f' and the Shape of f | |
| | Tue 11/02 | 3.4 f" and the Shape of f | |
| 10 | Thu 11/04 | 3.5 Applied Maximums & Minimums | |
| | Tue 11/09 | 3.6 Asymptotes | |
| 11 | Thu 11/11 | 3.7 L'Hospital's Rule | |
| | | 4.0 Introduction to Integrals | |
| | Tue 11/16 | 4.1 Sigma Notation & Riemann Sums | |
| 12 | Thu 11/18 | 4.2 The Definite Integral | |
| | Tue 11/23 | 4.3 Properties of the Definite Integral | |
| 13 | Thu 11/25 | Thanksgiving - No classes | |
| | Tue 11/30 | 4.4 Areas, Integrals and Antiderivatives | |
| 14 | Thu 12/02 | 4.5 The Fundamental Theorem of Calculus | |
| | Tue 12/07 | 4.6 Finding Antiderivatives | |
| | | Presentations | |
| 15 | Thu 12/09 | Final Exam Review | |
| | Tue 12/14 | Final Exam | |

| Assessment Schedule | | | |
|---------------------|-----------|------------------------------------|--|
| Week | Date | Assessments | |
| 1 | Tue 8/31 | NA | |
| 2 | Tue 9/07 | Initial Assessments: 0.1, 0.5, 1.1 | |
| | | (Reassessments: 0.1, 0.5, 1.1) | |
| 3 | Tue 9/14 | Initial Assessments: 1.2, 1.3 | |
| | | (Reassessments: 1.0, 1.2) | |
| 4 | Tue 9/21 | Initial Assessments: 1.4, 2.0 | |
| | | (Reassessments: 1.4, 2.0) | |
| 5 | Tue 9/28 | Initial Assessments: 2.1, 2.2 | |
| | | (Reassessments: 2.1, 2.2) | |
| 6 | Tue 10/05 | Initial Assessments: 2.3 | |
| | | (Reassessments: 2.3) | |
| 7 | Tue 10/12 | Initial Assessments: 2.5, 2.6 | |
| | | (Reassessments: 2.5, 2.6) | |
| 8 | Tue 10/19 | Initial Assessments: 2.7, 2.8 | |
| | | (Reassessments: 2.7, 2.8) | |
| 9 | Tue 10/26 | Initial Assessments: 2.9 | |
| | | (Reassessments: 2.9) | |
| 10 | Tue 11/02 | Initial Assessments: 3.1, 3.2 | |
| | | (Reassessments: 3.1, 3.2) | |
| 11 | Tue 11/09 | Initial Assessments: 3.3, 3.4, 3.5 | |
| | | (Reassessments: 3.3, 3.4, 3.5) | |
| 12 | Tue 11/16 | Initial Assessments: 3.6, 3.7 | |
| | | (Reassessments: 3.6, 3.7) | |
| 13 | Tue 11/23 | Initial Assessments: 4.0, 4.1, 4.2 | |
| | | (Reassessments: 4.0, 4.1, 4.2) | |
| 14 | Tue 11/30 | Initial Assessments: 4.3 | |
| | | (Reassessments: 4.3) | |
| | | Initial Assessments: 4.4, 4.5 | |
| 15 | Tue 12/07 | Initial Assessment: 4.6 | |
| Final Exam | | (Reassessments: 4.4, 4.5, 4.6) | |
| Week | Tue 12/14 | Final Assessments: all | |

B. Assessment Schedule

Important Dates

| Date | Event | |
|--------------|---|--|
| September 8 | Refund drop deadline – you must drop the course by this date for a refund | |
| September 22 | No grade drop deadline – you must drop the course by this date to not receive a grade | |
| November 17 | W grade drop deadline – you must drop the course by this date to receive a W grade | |
| November 25 | 5 Thanksgiving – no class | |
| December 14 | Final Exam | |

The professor reserves the right to make changes to this syllabus.

Last Updated November 11, 2021
