

Over the past six year period, more than 35,000 students have had the opportunity to comment about one or more of courses that participated in the College Area Review. Having the students' input provide for a richer review and a means to evaluate our delivery of instructions and instructional materials. This effort keeps the students as the center of our focus, which emphasizes our culture of learning and assessment at Montgomery College.

The nine question survey selects courses based on high enrollments, courses that are taught on all three campuses and courses that are part of the general education curriculum. Students' responses are an indicator of students' acquisition of certain general educaton competencies, including communication, critical thinking, information literacy and subject matter knowledge.

There is one open-ended question for comments about the course only. Each year the survey continues to generate valuable student comments about each course. The comments provide insights of the student's impression of course content, textbook selection, course online offerings, and course rigor; but not about the instructor.

Most of the content of the survey remains the same from year to year. With help from the Office of Information Technology, we used the Banner Web Survey tool. In 2007, we begin collecting student demographic information. In 2009 and 2010, we awarded a student from each course a gift certificate. In 2010, we added a question related to the CCSSE survey regarding student participation. For additional information about the CAR Student Survey, please refer to the CAR Website.
